Ideation Phase
Brainstrom and Idea Prioritization

Date	13 September 2022
Team Id	PNT2022TMID14777
Project Name	Analytics for hospitals health care data
Maximum Marks	4 Marks

Name: T.Kavipriya
Roll no: 7179KCTKCTKCTKCTKCTKCTKCT19BCS031

Ideation 1:

To create an analysis on hospital health care data with maximum accuracy, so that user can easily view the reports daily, weekly, monthly and yearly. User can also get notification about reports.

Ideation 2:

To identify trend and patterns in the data through exploratory data analysis

Ideation 3:

To perform predictive analysis on the given hospital health care dataset and build interactive dashboard using IBM COGNOS analytics

Ideation 4:

To predict the time of each patient stayed in the hospital. This helps to allocate rooms for new patient and the hospital can function better.
